

# Contents of volume 31

- No. 1 (pp 1-106) published 30 May 1989  
 No. 2 (pp 107-214) published 4 July 1989  
 No. 3 (pp 215-322) published 27 July 1989  
 No. 4 (pp 323-434) published 21 August 1989  
 No. 5/6 (pp 435-634) published 21 September 1989

## Mini-review

- Sharma HSS: Economic importance of thermophilous fungi 1

## Biotechnology

- Bar R: Cyclodextrin-aided microbial transformation of aromatic aldehydes by *Saccharomyces cerevisiae* 25  
 Castellar MR, Borrego F, Cánovas M, Manjón A, Iborra JL: Continuous ethanol production at high glucose concentrations by a passively immobilized *Zymomonas mobilis* system (Short contribution) 249  
 Edey LA, Johns MR, Ewings KN: Fructose production by *Zymomonas mobilis* in fed-batch culture with minimal sorbitol formation 129  
 Friedrich J, Cimerman A, Steiner W: Submerged production of pectolytic enzymes by *Aspergillus niger*: effect of different aeration/agitation regimes 490  
 Fritzsche K, Syldatk C, Wagner F, Hengelsberg H, Tacke R: Enzymatic resolution of *rac*-1,1-dimethyl-1-sila-cyclohexan-2-ol by ester hydrolysis or transesterification using a crude lipase preparation of *Candida cylindracea* 107  
 Gendel SM, Nohr RS: Growth and nitrogen fixation by immobilized cyanobacteria 138  
 Gibb GD, Ordaz DE, Strohl WR: Overproduction of extracellular protease activity by *Streptomyces* C5-A13 in fed-batch fermentation 119  
 Grishin SI, Tuovinen OH: Scanning electron microscopic examination of *Thiobacillus ferrooxidans* on different support matrix materials in packed bed and fluidized bed bioreactors 505  
 Hamada T, Ishiyama T, Motai H: Continuous fermentation of soy sauce by immobilized cells of *Zygosaccharomyces rouxii* in an airlift reactor 346  
 Hansson L, Dostálek M, Sörenby B: Production of  $\gamma$ -linolenic acid by the fungus *Mucor rouxii* in fed-batch and continuous culture 223  
 Heyndrickx M, De Vos P, Speybroeck A, De Ley J: Fermentation of mannitol by *Clostridium butyricum*: role of acetate as an external hydrogen acceptor 323  
 Honecker S, Bisping B, Yang Z, Rehm H-J: Influence of sucrose concentration and phosphate limitation on citric acid production by immobilized cells of *Aspergillus niger* 17  
 Houng J-Y, Chen K-C, Hsu W-H: Optimization of cultivation medium composition for isoamylase production (Short contribution) 61  
 Hüsemann MHW, Papoutsakis ET: Enzymes limiting butanol and acetone formation in continuous and batch cultures of *Clostridium acetobutylicum* 435

- Ishihara K, Suzuki T, Yamane T, Shimizu S: Effective production of *Pseudomonas fluorescens* lipase by semi-batch culture with turbidity-dependent automatic feeding of both olive oil and iron ion 45  
 Kanasawud P, Hjörleifsdóttir S, Holst O, Mattiasson B: Studies on immobilization of the thermophilic bacterium *Thermus aquaticus* YT-1 by entrapment in various matrices 228  
 Kantelinen A, Hatakka A, Viikari L: Production of lignin peroxidase and laccase by *Phlebia radiata* 234  
 Kautola H, Linko YY: Fumaric acid production from xylose by immobilized *Rhizopus arrhizus* cells 448  
 Legiša M, Kidrič J: Initiation of citric acid accumulation in the early stages of *Aspergillus niger* growth 453  
 Lidén G, Larsson C, Gustafsson L, Niklasson C: A calorimetric and fluorescence study of batch cultures of *Saccharomyces cerevisiae* 355  
 Lokotsch W, Fritzsche K, Syldatk C: Resolution of D,L-menthol by interesterification with triacetin using the free and immobilized lipase of *Candida cylindracea* 467  
 Maconi E, Aragózzini F: Stereoselective reduction of non-cyclic ketones with lactic acid bacteria 29  
 Macris BJ, Kekos D, Evangelidou X: A simple and inexpensive method for cellulase and  $\beta$ -glucosidase production by *Neurospora crassa* (Short contribution) 150  
 Miličić S, Kremser M, Gaberc-Porekar V, Didek-Brumec M, Sočić H: The effect of aeration and agitation on *Claviceps purpurea* dimorphism and alkaloid synthesis during submerged fermentation 134  
 Mitsuda S, Nabeshima S, Hirohara H: Studies on enantioselective hydrolysis of the acetic ester of a secondary alcohol with *Arthrobacter* lipase 334  
 Monnet V, Bockelmann W, Gripon JC, Teuber M: Comparison of cell wall proteinases from *Lactococcus lactis* subsp. *cremoris* AC1 and *Lactococcus lactis* subsp. *lactis* NCDO 763. II. Specificity towards bovine  $\beta$ -casein 112  
 Moresi M, Patete M, Trunfio A: Scaling-up of a batch whey fermentation by *Kluyveromyces fragilis* 495  
 Mozaffar Z, Nakanishi K, Matsuno R: Production of trisaccharide from lactose using  $\beta$ -galactosidase from *Bacillus circulans* modified by glutaraldehyde (Short contribution) 59  
 Mulligan CN, Chow TY-K, Gibbs BF: Enhanced biosurfactant production by a mutant *Bacillus subtilis* strain 486  
 Nakamura K, Amano Y, Nakayama O: Determination of free sulphite in wine using a microbial sensor 351  
 Ngang JJE, Letourneau F, Villa P: Alcoholic fermentation of beet molasses: effects of lactic acid on yeast fermentation parameters 125  
 Ng TK, Hu WS: Adherence of emulsan-producing *Acinetobacter calcoaceticus* to hydrophobic liquids 480  
 Olvera-Treviño MA, Wachter-Rodarte MC, Canales AL-M: An endoglucanase from an isolated strain of *Bacillus circulans* 146  
 Page WJ: Production of poly- $\beta$ -hydroxybutyrate by *Azotobacter vinelandii* strain UWD during growth on molasses and other complex carbon sources 329  
 Planchard A, Mignot L, Jouenne T, Junter G-A: Photoproduction of molecular hydrogen by *Rhodospirillum rubrum* immobilized in composite agar layer/microporous membrane structures 49  
 Powalla M, Lang S, Wray V: Penta- and disaccharide lipid formation by *Nocardia corynebacterioides* grown on *n*-alkanes 473  
 Renko M, Vitale LJ, Kokalj M, Pokorný M: *Streptomyces rimosus* extracellular proteases. 4. Trypsin-like proteinase 38

- Riedel K, Naumov AV, Grishenkov VG, Boronin AM, Stein HJ, Scheller F, Mueller H-G: Plasmid-containing microbial sensor for  $\epsilon$ -caprolactam 502
- Santos-Rosa F, Galván F: Ammonium photoproduction by free and immobilized cells of *Chlamydomonas reinhardtii* 55
- Schmidt H, Bode R, Samsonova IA, Birnbaum D: Production of  $\alpha$ -amino adipate- $\delta$ -semialdehyde by a mutant from *Candida maltosa* 463
- Shinmen Y, Shimizu S, Akimoto K, Kawashima H, Yamada H: Production of arachidonic acid by *Mortierella* fungi. Selection of a potent producer and optimization of culture conditions for large-scale production 11
- Shirai Y, Hashimoto K, Irie S: Formation of effective channels in alginate gel for immobilization of anchorage-dependent animal cells 342
- Shiraishi F, Kawakami K, Tamura A, Tsuruda S, Kusunoki K: Continuous production of free gluconic acid by *Gluconobacter suboxydans* IFO 3290 immobilized by adsorption on ceramic honeycomb monolith: effect of reactor configuration on further oxidation of gluconic acid to keto-gluconic acid 445
- Shvinka JE, Pankova LM, Mežbarde IN, Liciš LJ: Hydrogen peroxide production by *Zymomonas mobilis* 240
- Suzuki Y, Oishi K: A relationship between efficiency of isomaltosaccharide hydrolysis and thermostability of six *Bacillus* oligo-1,6-glucosidases 32
- Tsvetkov VT, Emanuilova EI: Purification and properties of heat stable  $\alpha$ -amylase from *Bacillus brevis* (Short contribution) 246
- Vasić-Racki D, Jonas M, Wandrey C, Hummel W, Kula M-R: Continuous (*R*)-mandelic acid production in an enzyme membrane reactor 215
- Wight CP, Daugulis AJ, Lau RH, White BN: Stimulation of extracellular protein production in *Bacillus brevis* 47 338
- Wilhelm C, Eggeling I, Nassenstein A, Jepsen C, Eggeling L, Sahm H: Limitations during hydroxybutyrate conversion to isoleucine with *Corynebacterium glutamicum*, as analysed by the formation of by-products 458
- Hobbs G, Frazer CM, Gardner DCJ, Cullum JA, Oliver SG: Dispersed growth of *Streptomyces* in liquid culture 272
- Huang C-M, Kelly WJ, Asmundson RV, Yu P-L: Molecular cloning and expression of multiple cellulase genes of *Ruminococcus flavefaciens* strain 186 in *Escherichia coli* 265
- Kück U, Walz M, Mohr G, Mracek M: The 5'-sequence of the isopenicillin N-synthetase gene (*pcbC*) from *Cephalosporium acremonium* directs the expression of the prokaryotic hygromycin B phosphotransferase gene (*hph*) in *Aspergillus niger* 358
- Nicholls DJ, Minton NP, Atkinson T, Sundaram TK: Cloning sequencing and over-expression of *Escherichia coli* malate dehydrogenase 376
- Pátek M, Nešvera J, Hochmannová J: Plasmid cloning vectors replicating in *Escherichia coli*, amino acid-producing coryneform bacteria and *Methylobacillus* sp. 65
- Rinas U, Kracke-Helm H-A, Schügerl K: Glucose as a substrate in recombinant strain fermentation technology. By-product formation, degradation and intracellular accumulation of recombinant protein 163
- Shibui T, Matsui R, Uchida-Kamizono M, Okazaki H, Kondo J, Nagahara K, Nakanishi S, Teranishi Y: Periplasmic production of human pancreatic prokallikrein in *Escherichia coli* 253
- Shibui T, Uchida-Kamizono M, Takizawa Y, Kondo J, Hiyoshi C, Murayama S, Morimoto Y, Teranishi Y: High-level expression of human proapolipoprotein A-I in *Escherichia coli* using expression plasmids containing tandemly polymerized proapolipoprotein A-I structural genes 518
- Striepecke R, Rosato YB, Astolfi-Filho S: Subcloning and expression of the  $\alpha$ -amylase gene from *Bacillus subtilis* in *Xanthomonas campestris* 512

## Applied microbiology

## Applied genetics and regulation

- Boze H, Guyot JB, Moulin G, Galzy P: Isolation and characterization of a derepressed mutant of *Schwanniomyces castellii* for amylase production 366
- Chan E-C, Ueng PP, Chen LF: Metabolism of D-xylose in *Schizosaccharomyces pombe* cloned with a xylose isomerase gene 524
- Cheshyre JA, Hipkiss AR: Low temperatures stabilize interferon  $\alpha$ -2 against proteolysis in *Methylophilus methylotrophus* and *Escherichia coli* 158
- Deed A, Seviour R: Formation and regeneration of protoplasts of *Sclerotium glaucum* 259
- Feldmann S, Sprenger GA, Sahm H: Ethanol production from xylose with a pyruvate-formate-lyase mutant of *Klebsiella planticola* carrying a pyruvate-decarboxylase gene from *Zymomonas mobilis* 152
- Gayer-Herkert G, Schneider J, Kutzner HJ: Transfection and transformation of protoplasts of the thermophilic actinomycete *Faenia rectivirgula* 371
- Aono R: Subcellular distribution of alkalophilic *Bacillus* penicillinase produced by *Escherichia coli* HB101 carrying pEAP31 397
- Blasig R, Huth J, Franke P, Borneleit P, Schunck W-H, Müller H-G: Degradation of long-chain *n*-alkanes by the yeast *Candida maltosa*. III. Effect of solid *n*-alkanes on cellular fatty acid composition 571
- Bockelmann W, Monnet V, Geis A, Teuber M, Gripon JC: Comparison of cell wall proteinases from *Lactococcus lactis* subsp. *cremoris* AC1 and *Lactococcus lactis* subsp. *lactis* NCDO 763. I. Purification and action of the enzymes on caseins 278
- Bragger JM, Daniel RM, Coolbear T, Morgan HW: Very stable enzymes from extremely thermophilic archaeobacteria and eubacteria 556
- Bringer-Meyer S, Sahm H: Junctions of catabolic and anabolic pathways in *Zymomonas mobilis*: phosphoenolpyruvate carboxylase and malic enzyme 529
- Chan M, Breuil C, Schwald W, Saddler JN: Comparison of methods for quantifying the hydrolytic potential of cellulase enzymes 413
